

### REMARKS/ARGUMENTS

Favorable consideration of this application is respectfully requested.

The present application is a continuation of copending parent U.S. application serial no. 09/698,031. The specification is amended by the present response to reflect the status of the present continuation application.

In the present continuation application new original Claims 1-7 are presented for examination. Those claims are believed to be allowable based on the allowed claims in the parent of the present application.

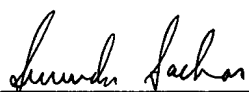

More specifically, new independent Claim 1 corresponds to Claim 1 in the parent of the present application, but recites the additional feature of “providing at least one camera at a corner of a display”. That feature is believed to be fully supported by the original specification, see for example cameras 10 and 11 in Figure 1 in the present specification. New independent Claims 3 and 5 are similar to new independent Claim 1 except that those new claims are written as device claims.

New independent claim 7 is also submitted that corresponds to allowed claim 1 in the parent of the present application, except being written as an apparatus claim.

The present application is believed to be in condition for a full and thorough examination on the merits. An early and favorable consideration of the present application is hereby respectfully requested.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,  
MAIER & NEUSTADT, P.C.
